

DIGITAL MARKETING

Email, Text Messaging, and Web Solutions

Step up your online communications with the DocuMatix Product Suite. This comprehensive solution includes an Email Manager, Digital Document Rack and plenty of powerful tools to create PURLs, forms, manage events, surveys and more.

DocuMatix On Demand

Generate emails, direct mail letters and text messages from any core processor. Then set just about any event or activity, like NSF, ODP, account openings or birthdays, to trigger them for distribution.

DocuMatix Text Messaging

Talk to your members and customers in real time – wherever they are. Create and manage SMS text communications triggered by transactions or to promote marketing efforts.

WebTrax

Identify your website visitors and monitor their activity. Then automatically respond, via email or print, with relevant, targeted content. Leverage one of your greatest assets – your website – to personalize the customer experience.

CommLink

Keep your frontline team in-the-know with direct access to all marketing messages sent to your customers as they happen. CommLink, a web-based application, keeps the power of automated marketing relevant with real-time updates you can act on.
